

## **PLEASE NOTE**

# **FUEL DOOR COVER**

## **INSTALLATION INSTRUCTIONS**

Thank you for purchasing the Fuel Door Cover.

Before installing, clean door area with an alcohol base cleaner. Remove door cover from packaging, check against vehicle for proper fit before installing. Once confirmed, remove backing off of the 3M tape. Use caution when placing the cover and ring on the vehicle for proper alignment. Apply pressure on the cover and ring to insure it adheres to the vehicle. The recommended surface temperature for applying 3M tape is between 16-43°C (60-110°F).
