1"OD, SS, Blk Ox.
Part #018069

e) (2) Washer, Offset
0.281" x 1.5", SS
Part #018087

INSTALLATION *(For ease of installation it is suggested that the wheel be removed)*

1. Before you install your Mud Flap Set, see the diagram and parts list for all necessary parts.
2. Remove the (4) lowest factory push pins on the fender lip. Set 1 aside for reinstallation and discard the remaining 3.
3. Pull back fabric liner and install spring nuts (c) on factory holes #1 to #3 with the extruding end facing in. (See Diagram #1).
4. Loosely install mud flap holes #7 & #8 to factory holes #2 & #3 through spring nuts (c) using a capscrew (b) and flat washer (d).
5. Line mud flap hole #9 up with the fabric liner and mark the spot using a marker. Using a ¼" drill bit, drill a small hole (#4) in the liner in that location. Gently pull back the liner and install a spring nut (c) on fender lip, lining it up with the hole in the fabric liner with the extruding end facing out. Put the liner back in place and reinstall the previously removed factory push pin into hole #5.
6. Loosely install mud flap hole #9 to spring nut (c) using a capscrew (a) and flat washer (d)
7. Loosely install mud flap hole #6 to factory hole #1 through spring nut (c) using a capscrew (b) and offset washer (e) installing the capscrew through the outer hole of the washer.
8. Before tightening, check that the flap is straight and level using a square or bubble level. (Do not over tighten)
9. Repeat procedure for the passenger side.
